

Practical and Research proven Allergy solutions

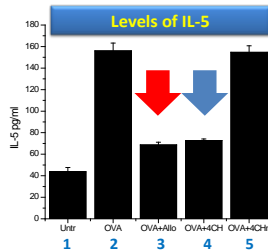

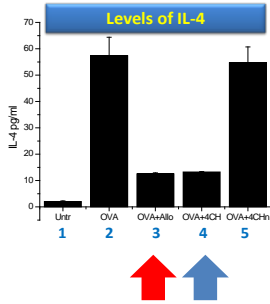

The 2009 Pulmonary, Rumio Pubmed study demonstrated how [Low dose oral administration of Guna prepared cytokines worked for the treatment of allergic asthma.](#)

The study brought a healthy mouse into an allergic state, at which point Th2 became up-regulated. To bring back the balance IL-12 and Interferon gamma was used. These Th1 molecules up-regulated Th1 to re-balance in TH1 & Th2 ratios.

Level of IL-4 and IL-5 in mice sera on day 7th of treatment

The results with the GUNA prepared method are amazing:
 Column 1- control with the healthy mouse interleukin level
 Column 2- qty of Interleukin in allergic mouse
 Column 3- **pharma dose** of balancing interleukin, **mouse died**
 Column 4- **Guna physiological dose, no side effects**
 Column 5 – physiological dose, dilution only, not dynamized

Guna integrates this science into all its formulations

GUNA-All-Prev a direct link to this study, rebalancing of Th1 & Th2 & deals with the main symptoms behind allergies.

GUNA-All-Trt addresses allergic reactions to offer relief of symptoms.

GUNA-Matrix keeps the extra cellular system clean & eliminates irritants.

Vibrant Health has a full range of products for seasonal allergies with a focus on the phenol (allergen) component. **Designed to de-sensitize & relieve.**

P'llens Early relief of symptoms due to early season pollens

P'llens Mid relief of symptoms due to mid season pollens

P'llens Late relief of symptoms due to late season pollens

Ask about our Products for allergies to Pets, Foods, Dairy, Chemicals, Terpenes & a host of other challenges including our core reactional products **Rescue 3 & Rescue +** designed to calm the reactional process regardless of the cause. **Call us to learn more & start getting optimum results.**
